SUMMARY

Software Engineer with experience building full-stack applications and automation systems, including an agentic AI solution for enterprise workload migration. Hands-on experience with cloud data platforms, big data technologies, distributed data processing, and performance testing.

EXPERIENCE

Research Assistant, AI Data Platform (AIDP) E2E Customer Scenarios Mar 2026 - Sep 2026
Oracle Casablanca

Technologies: Python, Scala, Apache Spark, Locust, Streamlit, Oracle Cloud Infrastructure, REST APIs, WebSockets

- Migrated 35 customer data and ML workflows totaling 274 tasks from Databricks to AIDP for a major digital financial services provider by building an agentic AI system that reconstructs pipeline DAGs, translates Databricks-specific code and dependencies into AIDP-native equivalents, and autonomously runs, monitors, diagnoses, and repairs workflows until E2E validation.
- Built an internal automation application used by 16 teams to configure, schedule, execute, and monitor load and performance test suites for their services on AIDP, with live logging and centralized run history
- Designed and automated 60+ test suites for Oracle AI Data Platform, covering performance and scalability testing across 16 services, including compute, notebooks, libraries, workflows, agent flows, and knowledge bases
- Partnered with product and forward-deployed engineers to translate customer requirements into test scenarios

Software Developer Intern Oct 2023 - Mar 2024
CITIC Dicastal Kenitra

Technologies: ASP.NET Core Web API, React.js, SQL Server, Entity Framework Core, JWT, LDAP

- Built and deployed an internal travel approval platform on the company's IIS server, supporting 5 request types with approval workflows involving managers, HR, finance, and executives
- Integrated LDAP/JWT authentication with automated request routing and complete approval histories
- Automated PDF report generation with electronic approver signatures, trip details, and calculated expenses

Software Developer Intern Apr 2022 - Jun 2022
The Court of Appeal Kenitra

Technologies: PHP, Laravel, Bootstrap, MySQL

- Built and deployed an internal web application on the court's local network to centralize the management of employees, workspaces, and government equipment
- Implemented employee transfer and equipment assignment workflows across court offices, maintaining complete histories for traceability
- Developed restorable archives to preserve historical staff and equipment data and support administrative decision-making

PROJECTS

Astralis - Scroll Through the Cosmos

Next.js, TypeScript, Tailwind CSS

Built a space-media discovery app powered by NASA's Open APIs, with a swipeable feed for exploring astronomy imagery, video, and data from telescopes, rovers, and satellites. (Live Demo)

Coursify - Online Courses Platform

ASP.NET Core Web API, React.js, SQL Server

Built an e-learning platform with lessons and quizzes, focused on a simple, self-guided learning experience.

SKILLS

Languages	Python, Java, C#, TypeScript, JavaScript, SQL
Backend	Spring Boot, ASP.NET Core, REST APIs
Frontend	React.js, Next.js, Streamlit
Data & AI	Apache Spark, PySpark, Vector Search, Vector Embeddings, Knowledge Bases
Cloud & DevOps	Azure, OCI, Docker, GitHub Actions, Git, Linux
Databases	PostgreSQL, SQL Server, MySQL, Oracle Autonomous AI Database 26ai

EDUCATION

Master's in Software Engineering for Cloud Computing, Ibn Tofail University Expected 2026
Relevant Coursework: Web Services, DevOps, Big Data, and Deep Learning.

Bachelor's in Mathematics and Computer Science, Ibn Tofail University 2023 - 2024

University Diploma of Technology in Computer Engineering, Superior School of Technology 2020 - 2022
